

SUSTAINABLE INCOME

Planning for future income demands preparation for an unknown tomorrow. In this film we explore the philosophy of Sustainable Income and how they are seeking real income, time after time

As with any investment, capital is at risk. Past performance is not a guide to future returns.

This communication was produced and approved in June 2021 and has not been updated subsequently. It represents views held at the time and may not reflect current thinking.

Planning for future income demands preparation for an unknown tomorrow.

That's why we have designed a core income solution, which aims to provide the highest level of income that is resilient and sustainable over decades.

Combining a diverse set of asset classes offers us the flexibility to adapt to changing economic conditions, seeking to protect income from short-term shocks and inflation in the long term.

We are long-term fundamental investors with a strong history of skilled stock picking. Reliable income for the long run requires experience. This is what we do.

When looking for income, we look to the future and ask, which investments are prepared for the challenges of tomorrow, in the market and our society?

With focus on the best worldwide investments, across nine asset classes, we are ideally placed to deliver a lifetime of resilient income.

You seek a reliable source of income for the future, we seek out real income. Time after time.
